

Professor Jeff Dunn AO B.Sc., M.S.P.D., Ph.D.

Head of Research and Chief of Mission,
Prostate Cancer Foundation of Australia;

Professor of Social and Behavioural Science;

Chair of Cancer Survivorship, University of Southern Queensland; and
Immediate Past President, Union for International Cancer Control, *BRISBANE*

Jeff Dunn is the University of Southern Queensland's Professor of Social and Behavioural Science and Chair of Cancer Survivorship. He is the Immediate Past President of the Geneva-based Union for International Cancer Control, and Chief of Mission at Prostate Cancer Foundation of Australia.

In 2024, Prof Dunn was ranked by Stanford University as among the top 2 per cent of scientists worldwide for oncology and clinical medicine, confirming his status as an international leader in the social and behavioural aspects of cancer.

Over the course of his 30-year career, Prof Dunn has pioneered patient-centred care, working across disciplines to build community capacity in cancer control, influencing local, national and global health policies and programs. His research has been published in more than 200 publications, including peer reviewed manuscripts, books, chapter and government reports. Scival (2024) includes Prof Dunn in the top three global high impact researchers in prostate cancer survivorship and quality of life.

He serves as Deputy Chair and Board Member of Queensland's West Moreton Hospital and Health Service, and is Chair of the Board's Research Committee. Previously Prof Dunn has served as President of the Asia Pacific Organisation for Cancer Prevention and Secretary for the International Psycho-oncology Society, and CEO of the Cancer Council Queensland and the Prostate Cancer Foundation of Australia.

In 2014, Prof Dunn was appointed an Officer in the Order of Australia for distinguished service to medical administration through leadership of cancer control organisations and promotion of innovative and integrated cancer care programs. In 2022, he was diagnosed with a rare form of cancer called Mantle Cell Lymphoma and underwent an autologous stem-cell transplant. Although still undergoing treatment, he continues to champion the needs of cancer survivors in representations to government, the cancer control sector, learned societies and academia, both in Australia and globally.
